READ THE FOLLOWING CAREFULLY:

1. Each of the following questions comprise 5 statements, for which you should select the one most appropriate answer. Each question is worth the same amount of points.
2. The exam mark is based on the overall number of correctly answered questions. The more questions you answer correctly the higher your mark, incorrectly answered questions do not count against you.
3. Enter your name and examination number IN PENCIL on the computer answer sheet according to the instructions on that sheet.
4. When you have completed this exam paper, read the instructions on the computer answer sheet carefully and transfer your answers from the exam paper. Use a HB pencil to mark the computer answer sheet and if you change your mind be sure to erase the mark you have made. You may then mark the alternative answer.
5. At the end of the examination, be absolutely sure to hand in BOTH this exam paper AND the computer answer sheet.
6. Calculators are NOT permitted.
